SUMMARY

B.Tech CSE (Cloud Computing) graduate with hands-on experience in full-stack development, ML systems, and LLM applications. Built a hybrid RAG system with BM25 + cross-encoder reranking and an ML pipeline achieving 99.4% accuracy. Seeking Python Developer or Data Analyst roles.

EDUCATION

SRMIST-KTR, 2022 – 2026
B.Tech Computer Science and Engineering-Cloud Computing
CGPA: 7.66

NARAYANA JUNIOR COLLEGE, Class XII – TSBIE (PCM) 2019 – 2021
Percentage-81.18%

EXPERIENCE

Edunet Foundation-Shell Energy ☑, 07/2025 – 11/2025 | Chennai, Tamil Nadu
Software & Data Engineering Trainee
Developed and optimized data models for sustainability-focused AI applications using Python and SQL, conducting risk assessment and process optimization across 4+ team projects.

PROJECTS

Predictive Fitness & Nutrition System (Python, Flask, SQL) 12/2025 – 05/2026
• Built a two-stage chained ML pipeline where Stage 1 workout prediction is injected as a feature into Stage 2 nutrition prediction, achieving 99.40% and 98.75% accuracy on a 10,000-record synthetic dataset.
• Benchmarked 5 algorithms across Accuracy, Precision, Recall and F1, then assembled the top 3 into a soft-voting ensemble that outperformed all individual models
• Implemented LIME and SHAP for per-prediction and global feature importance, with IQR-based outlier removal during preprocessing.

Full-Stack RAG Application (React, FastAPI, ChromaDB, Docker) ☑ 03/2025 – 04/2025
• Built a multi-tenant RAG system enabling natural language querying of complex PDFs via a React frontend, async FastAPI backend, and Google Gemini for embeddings and generation.
• Engineered a hybrid retrieval pipeline combining Gemini dense embeddings with BM25 lexical search using Reciprocal Rank Fusion, re-ranked by a Cross-Encoder model for precision-optimized document retrieval.
• Designed an ingestion pipeline with recursive text splitting, multi-dimensional metadata tracking, and persistent per-collection ChromaDB vector storage.
• Built a dark-themed React UI with drag-and-drop PDF upload, dynamic collection management, and source citations with exact page numbers and relevance scores.

SKILLS

Programming Languages: Python, JavaScript, SQL

Frameworks & Libraries: Flask, React, FastAPI, REST APIs

Developer Tools: Git, GitHub, VS Code, Docker, Swagger

Databases: MySQL, MongoDB, ChromaDB

Cloud Platforms: AWS (EC2, S3, IAM), Railway, Render

ML Tools: Scikit-learn, Pandas, NumPy, LIME, SHAP, XGBoost

AI & LLM Tools: LangChain, Prompt Engineering, RAG

Domain Knowledge: OOP, DBMS, OS, DSA, Agile Methodologies, Cloud Computing, AI/ML

CERTIFICATIONS

Foundations, Data, Everywhere ☑
Google / Coursera, 2025

Green Skills and AI under Skills4Future program ☑
Shell / Edunet Foundation, 2025

LANGUAGES

English, Hindi, Telugu
